

From Concept to

Completion...

and Beyond

LAMINAIRE SYSTEMS

CLASS APART... IN CLEAN ROOM TECHNOLOGIES

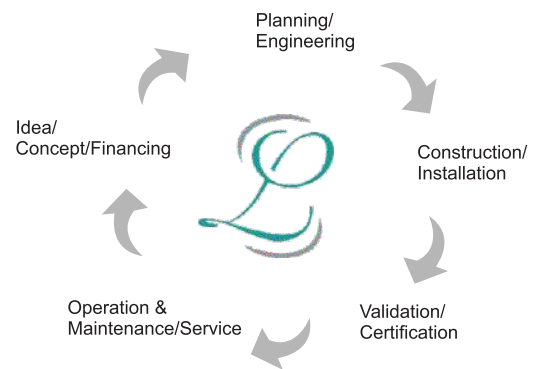

Laminaire Systems is a Dynamic organisation
Specialized in cleanroom HVAC technologies.

Laminaire Systems designs as well as builds
cleanroom for Pharmaceuticals, Health care,
Bio-Technology, Semiconductor, Electronics
Industrial application and food processing
Industries.

*Laminaire Systems Offers complete range of
cleanroom products and Turnkey solutions*

Concept to Completion . . .

Company specializes in offering concept to completion expertise for cleanrooms. Beginning from conceptualizing of the layout, to man – material movement, air management, control of temperature, differential pressure, Automation for total environment control, right up to the completion with certification and complete documentation. Highly qualified team of engineers and specialists help in execution of projects on time to the exacting requirements of the users.

Laminaire Systems offers training to the customers and their engineers for operation and maintenance of cleanroom which are designed and commissioned by LS.

Projects

Our expertise lies in offering complete solution for the following:

- HVAC and Air Management
- Electrical Services and Automation
- Complete Documentation

Company undertakes a thorough evaluation of every cleanroom project, with its specialists working with user to design an effective, economical cleanroom configuration and monitoring programme, suitable for given industry specific application.

Certification and Services

Laminaire Systems provides validation of cleanroom, clean room products and complete facility in accordance with standards like ISO 14644, Part 1, 2 & 3.

Complete Documentation on Design Qualification, Installation Qualification, Operational Qualification and Performance Qualification, is part of the total services provided. Above services are provided using state of the art equipments with “traceable” calibration certificates.

Comprehensive solutions to commissioning, balancing, qualifications and validation of cleanrooms, cleanroom products, Air management and other complete facility in accordance with international standards are provided by the company.

Products

To meet the stringent requirements and protocols of regulatory bodies like FDA/GMP for cleanrooms, to meet the quality needs, Laminaire Systems offers wide range of state of the art products.

Air Shower

Dynamic Pass Box

**Sampling /
Dispensing Booth**

Static Pass Box

Bio-Safety Cabinet

LAF Work Station

Garment Cubicle

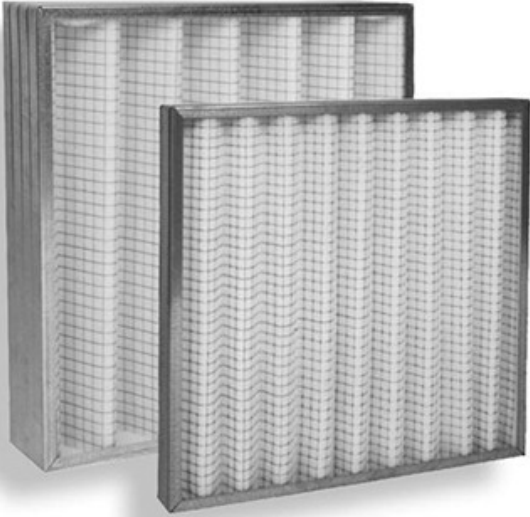

Air Handling Unit

Scientific Doors

Filters

Laminaire Systems has the state – of – the - art technology for manufacturing Air filters which are used in HVAC application.

1.Coarse Filters

Grade: G3 & G4

Frame Type: Flange / Box

MOC: Aluminium / SS

Media: Synthetic Fibres

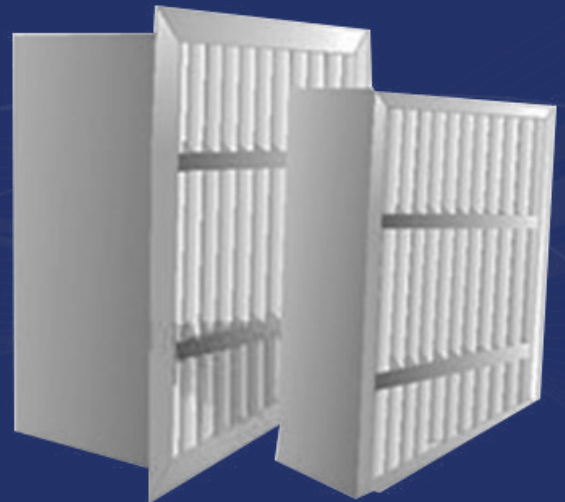

2.Fine Filters

Grade: F5 & F7

Frame Type: Flange / Box

MOC: Aluminium / SS

Media: Synthetic Non Woven

3.HEPA Filters

Grade: H11, H12, H13 & H14

Frame Type: Flange / Box

MOC: Aluminium / SS

Media: Sub Micronic Glass Fibre

Modular Operation Theatre

Laminaire Systems provides turnkey solutions for the Operation Theatres include complete Modular Wall Panels, Ceiling Panels, Scientific Doors, HVAC System, Laminar Air Flow Unit and Anti-Bacterial Vinyl/ Epoxy Flooring.

We provide solutions in accordance with the International and NABH.
